* N.B.: Survey and campus counts are not entirely compatible nor directly comparable. The directionality of the Campus-Survey differences found above are all in the expected direction given the notes below concerning differences between the two in the nature of their race/ethnic data: Survey counts represent **all** respondents having checked the various backgrounds requested on the survey and listed above. As such, they **include multiple counts** for all those respondents having checked more than one R/E background on the survey. Multiple responses were permitted. However, campus counts represent all and only the counts of the **single** race/ethnic backgrounds in the Vassar student records system, plus, but summed into a single separate category, all those who indicated any combination of "Two or More" backgrounds.
